

"Crafting Young Minds for Success"

Mission Statement: The MindCraft Academy curriculum is a values based program designed for parents who are looking for a well balanced program that provides children with a multitude of academic and recreational activities. Our goal here at the MindCraft Academy is for both the mind and the body of the child to be well stimulated through our broad menu of programs. Our Summer Camp Programs deliver a rich curriculum of intellectual pursuits for each child. After a year in the absence of socialization, there is a notable yearning for the essential recreational activities that youths have missed out on. We aim to address that craving. Whether you are primarily looking for Academic Enrichment or fun Recreational Activities, our experienced staff will provide a healthy mix of both here at the MindCraft Academy.
