

SUMMER PROGRAM

Mindcraft Academy Celebrates The **10th Year** of Our Summer Camp Program!

Whether your child is a returning student or a new student, we welcome them to another exciting summer filled with fun, learning and adventure! Each week campers will immerse themselves in hands-on activities, ranging from STEM (Science, Technology, Engineering & Mathematics) to outdoor fun trips, creative arts and crafts, chess, Chinese language class, baking, hand sewing, performing arts, sports, educational games and much, much more. We understand that summertime memories last a lifetime, and we are committed to delivering many for our students!

Below are the 9 themes we will also be covering, one for each week of our program.

Earth's Four Spheres

Week 1: 6/9 - 6/13

Planet Earth is our home. Students learn about plants, animals, weather, climate, oceans, and the seasons. They will gain a greater awareness of their environment, helping them to understand the importance of taking care of our planet.

Money (Financial Literacy)

Week 2: 6/16 - 6/20

Understanding money equips our students with the confidence, knowledge, and skills to manage their finances effectively. Developing good money habits is a critical skill that will help children thrive in today's world. Where does money come from? How can I use it wisely? How do I save money? This foundational knowledge will empower your child for life.

Life Skills

Week 3: 6/23 - 6/27

Life skills are necessary for survival, self-sufficiency, and productivity in everyday life. For children, it's important to start learning these skills early so they have time to practice and develop them as they grow. Understanding etiquette, manners, decorum, personal hygiene, and body language helps children form good habits that last a lifetime.

STEMsters

Week 4: 6/30 - 7/4

This module bursts with incredible science facts about the way our world works. From biology, chemistry, physics and natural history, students will discover incredible secrets, awesome theories and conduct fun experiments as they embark on their journey of scientific discovery!

Our Community

Week 5: 7/7 - 7/11

By observing and participating in our community, students learn about themselves, their world, and how to develop relationships with others. Each student has unique strengths, interests, and perspectives to contribute. Through service and volunteering, we learn to respect our friends, family, and neighbors.

Leadership

Week 6: 7/14 - 7/18

Speaking in public can be nerve wracking. Students will work towards developing confidence in their communication skills. In a world that increasingly relies on technology, it is more important than ever for children to learn how to communicate effectively whether in-person or on a video call.

Culture Week

Week 7: 7/21 - 7/25

One of the best things about living in the San Francisco Bay Area is our access to diverse cultures. We live in an incredible melting pot, where we can experience different culture through food, the arts, dance, movies, theatre, and festivals. Let's learn about and celebrate the beauty of cultural diversity together!

Urban Designs

Week 8: 7/28 - 8/1

Campers will explore how cities and towns function efficiently. They'll gain a deeper understanding of the built environment by examining everyday structures: My school is like a mini-city, and my house is a mini kingdom. What's behind the wall in my bedroom? How does the light switch work? How does water flow instantly from the faucet? It's like magic!

To Infinity and Beyond

Week 9: 8/4 - 8/8

Space is a topic that fascinates children and encourages them to ask big questions about the universe. Students will apply and build on scientific concepts as they develop an understanding of the vast world beyond our planet. Join us as we journey from early aviation to space exploration!

Program Tuition:

5 Days: \$450

4 Days: \$400

3 Days: \$360

Hours: 8:00AM to 6:30PM

Weeks Offered: June 9 to August 8th

A hot lunch will be served daily with 2 snacks provided throughout the day

Field Trips planned for Fridays

*Programs subject to change
