

# SUMMER PROGRAM

Mindcraft Academy celebrates its 10th Year of Summer Camp!

Whether your child is a returning camper or a new camper, we welcome them to another exciting summer filled with fun, learning and adventure. Every week campers will immerse themselves in hands-on activities, ranging from STEM (Science, Technology, Engineering & Mathematics) to outdoor fun trips to creative arts and crafts, and performing arts, sports and games. We understand that summertime memories last a lifetime and we are committed to delivering many for our campers! Below are the 9 themes, one for each week of our program.

Week 1 6/8-6/12

## Earth's 4 Spheres

The earth is our home. Students learn about plants, animals, weather, climate, oceans, and the seasons. Students become more aware of their environment, helping them understand how important it is to take care of our planet.

Week 2 6/15-6/19

## Leadership

Speaking in public can help children develop confidence in their communication skills. In a society that increasingly relies on technology, it is more important than ever for children to learn how to communicate effectively with others.

Week 3 6/22-6/26

## Life Skills

Life Skills are necessary for survival, self-sufficiency and productivity in everyday life. For children, it's important to start learning these different life skills so they have plenty of time to practice them before they reach adulthood. Knowing etiquette, manners, decorum, and body language will differentiate good habits from bad ones.

Week 4 6/29-7/3

## STEMsters

This module bursts with incredible science facts about the way our world works. From biology, chemistry, physics and natural history, students will discover incredible secrets, awesome theories and conduct fun experiments as they embark on their journey of scientific discovery!

Week 5 7/6-7/10

**Money (Financial Literacy)**

Learning about money equips our students with the confidence, knowledge, and skills to manage their money effectively now and in the future. Developing good money habits is a critical skill that children need to thrive throughout their lives.

Week 6 7/13-7/17

**Junior Shark Tank**

Find the creative entrepreneur within you! Think of a product, develop it, promote and market it. Understanding the importance of demand is how it is created and the marketplace where products can be sold. Learn about business growth, business challenges and the sweet rewards of profits and success!

Week 7 7/20-7/24

**Our Community**

By observing and participating in the community, students learn about themselves, their world, and how to develop relationships with others. Each student has unique strengths, interests, and perspectives to contribute and serve others, learning to acknowledge, respect and value each other's differences.

Week 8 7/27-7/31

**The American Dream**

What has made America different and unique from every other country over the last century? Freedom, liberty, and the pursuit of happiness. Defining the American Dream, where with hard work and dreaming big, you can still achieve your dreams. Learn about the constitution, our rich history, our independence and the unique privileges we all share.

Week 9 8/3-8/7

**Fabric Fusion**

A hands-on exploration into the creative arts of textiles, vinyl sticker creation, and t-shirt design. Fabric Fusion is the perfect setting for young artists to discover the joy of making and personalizing their creations. They can then show and wear their art proudly!

**\*Field Trips planned for Fridays**

Note: Programs subject to change
